SUMMARY

Fullstack Developer with practical experience building backend, frontend, and AI-enabled solutions using C#, ASP.NET Core, React, Python, and SQL. I've delivered several self-initiated projects end-to-end - from shaping the problem, designing the workflow, and writing the code to documenting the final system. My background as a computer science teacher gives me a clear, structured communication style and the ability to explain technical concepts to any audience.

I work analytically, learn new technologies quickly, and enjoy turning unclear requirements into working software. I've built AI/LLM prototypes, ETL pipelines, and Python/Flask applications, and I use AI tools as part of my daily development workflow. I'm motivated by building reliable, well-structured solutions and improving them through feedback and iteration.

EXPERIENCE

Backend & Frontend Intern | Oves Optik | Apr 2025 – Jul 2025

- Contributed to backend (Node.js/PostgreSQL) & frontend (React) development in a production environment
- Implemented appointment and prescription flows, improving data consistency and system reliability
- Built dashboards for real-time visualization and documented workflows for the final client demo
- Worked across the full lifecycle: clarified requirements, implemented features, tested flows, fixed issues, and documented the system

Tech: React, Node.js, PostgreSQL, Git, dashboards, workflow documentation

Vocational IT Programming | Lexicon | Aug 2024 – Feb 2025

- Developed full stack applications using C#, ASP.NET Core, JavaScript, Entity Framework and SQL
- Practiced Agile/Scrum workflows using Git, Azure DevOps and project boards
- Strengthened backend development fundamentals, including API design, asynchronous programming and structured problem-solving
- Learned principles relevant to TDD, unit testing and version control

Tech: C#, ASP.NET Core, SQL, Git, Azure DevOps, Agile/Scrum

Author & Content Creator | India | June 2018 – March 2023

- Published novels and poetry collections in Tamil
- Developed strong editorial skills: structuring, proofreading, and adapting content for different audiences
- Managed book publishing, pricing, budgeting, distribution, and customer communication

Teacher & Guest Lecturer – Computer Science | India | 2005 – 2008

- Taught programming, databases and networking to university students
- Designed course materials and guided academic projects

SELF-INITIATED PROJECTS

ApplyInsights – Data/Backend Developer | Python, Flask, MySQL | [GitHub](#)

- Built an end-to-end ETL workflow: extract → transform → load job-related email data
- Created analytics dashboards (monthly trends, city-wise charts) using Matplotlib
- Automated test checks for ETL correctness and troubleshooting data inconsistencies

- Documented workflows and design decisions
- **AI/Automation:** ETL automation, workflow translation, data normalization

PolyAPI – Backend/AI Developer | Python, Flask, BLIP, BeautifulSoup | [GitHub](#)

- Developed backend features integrating AI/LLM models (BLIP for image captioning, text processing)
- Used AI-assisted coding tools for debugging, documentation, and model integration
- Ensured reproducibility through virtual environments and structured documentation
- Practiced refactoring for clarity and maintainability
- **AI/LLM:** Prompt engineering, model inference, AI-enabled backend features

Personal Storytelling Website — Designer & Developer | HTML, CSS, WordPress / Custom UI

- Built a clean, accessible UI with custom styling
- Improved user experience through structured design and continuous refinement
- Delivered a full end-to-end product used by real readers
- Managed content, user feedback, and continuous updates

Portfolio Website — Designer & Developer | React, ASP.NET Core Web

- Built a clean, accessible UI with React and custom styling
- Designed backend logic with ASP.NET Core Web and EF Core for structured data handling
- Implemented dashboard CRUD operations with SQL/Supabase
- Deployment setup using Vercel (frontend) and Render (backend) — *currently in progress*

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, Python

Backend: ASP.NET Core, Flask(Python), REST APIs, asynchronous programming

Frontend: React, HTML, CSS

Data Processing: Pandas, NumPy, ETL workflows, data cleaning

Cloud & Tools: GitHub, Azure DevOps, VS Code, SQL Server, Management Studio; basic understanding of Azure Storage, containers, Docker

Version Control & CI/CD: Git, GitHub workflows (learning level)

Documentation: Technical writing, structured reporting, GitHub README

AI/LLM: Prompt engineering, AI-assisted development, BLIP, model inference basics, Rapid prototyping

EDUCATION

- Vocational IT Programming – Lexicon, Sweden (2025)
- Master’s in Computer Applications – MKU, India (2002)
- Bachelor’s in Computer Science – MKU, India (2005)
- SFI D – Sweden (2023)
- SVA (2026)
- UHR Swedish Equivalence Assessment (SeQF – 7)

LANGUAGES

Swedish (good written, improving spoken), English (fluent), Tamil (native), Hindi (basic)

CERTIFICATIONS

- IBM Generative AI Engineering (Coursera, 2025)
